

Supplementary Materials: STRAIN PATTERN AND KINEMATICS OF THE CANARY ISLANDS FROM GNSS TIME SERIES ANALYSIS (Manuscript ID 892967)

José Arnosó, Umberto Riccardi, Maite Benavent, Umberto Tamaro, Fuensanta G. Montesinos, Isabel Blanco-Montenegro, Emilio Vélez

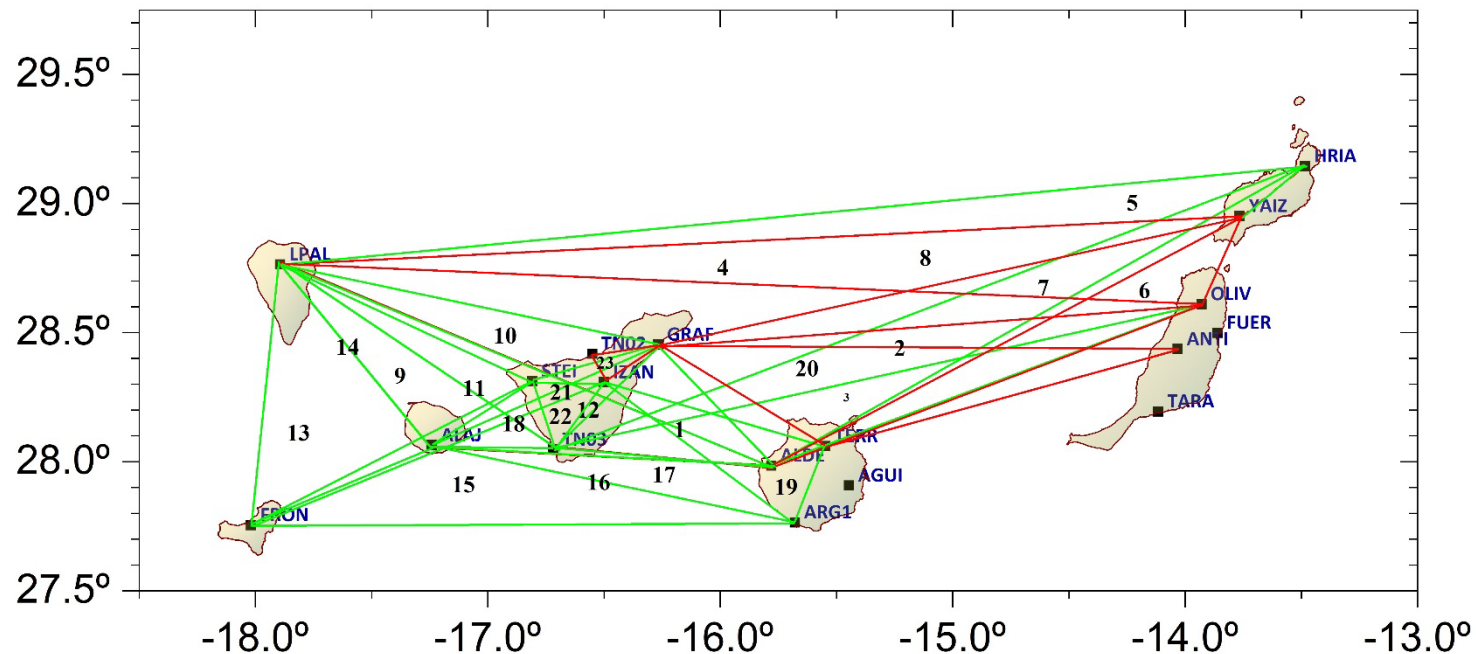

Figure S1. Triangles formed from 3 non-co-linear stations each, for the 23 GNSS stations used in this work (see Table 2). The horizontal strain was subsequently calculated for each triangle's centroid. The colour lines are just to draw a clearness figure.
